CYMBIDIUMS

Cymbidiums

MATURE PLANTS

Now is the time to add two or three well grown Cymbidiums to your collection to flower this coming winter. The following plants have been selected for their cultural condition and flower productivity. Any one of these plants should produce from 50 to 100 flowers this next season. Please note that there is only one of a kind and it is necessary to list alternate choices. Many of these plants can be divided into several divisions of three or four bulbs each. Unless otherwise specified, all plants will be shipped out of pots. They are well rooted and will avoid being damaged by shipping in this manner.
